Objective

Computer Science student and passionate **Flutter Developer** with hands-on experience building **cross-platform mobile applications** using **Flutter** and **Dart**.

Familiar with **REST APIs**, **JSON**, **BLoC/Cubit state management**, **Firebase**, and **responsive UI development**.

Education

- **Computer science and information (2024 – 2028)**

Assiut University **Cumulative GPA:** Very Good (3.55)

Skills

- **Mobile Development:** Flutter, Cross-Platform Development, Responsive UI
- **Programming Languages:** Dart, C++, Java, C#
- **State Management:** BLoC, Cubit
- **Backend & APIs:** REST APIs, JSON, Firebase
- **Networking:** HTTP, API Integration, Dio
- **Database:** SQLite, Hive
- **UI Development:** Material Design, RTL Layout, Multilingual Applications
- **Software Development:** OOP, Data Structures & Algorithms, Problem Solving
- **Tools & Technologies:** Git, GitHub, Postman, VS Code, Android Studio

Projects

News App | Flutter

- Developed a **Flutter news application** integrating with the **NewsAPI REST API** using **Dio**.
- Implemented **category-based news browsing** and **asynchronous data fetching** using **FutureBuilder**.
- Integrated an **in-app WebView** for viewing full news articles.
- Built **reusable UI components** to improve code organization and maintainability.
- Implemented **loading and error state handling** to provide a better user experience.

Weather App | Flutter & BLoC/Cubit

- Developed a **Flutter weather application** using **Dio** and **WeatherAPI** to fetch real-time weather data.
- Implemented **BLoC/Cubit state management** for efficient application state handling.
- Handled **loading, success, and error states** to provide a smooth user experience.
- Created a **Weather Model** to parse and organize **JSON API responses**.
- Implemented a **city-based search feature** for retrieving weather data by location.
- Displayed **current, minimum, and maximum temperatures** with weather conditions and icons.
- Added **dynamic theming** that changes based on conditions such as sunny, cloudy, rainy, and snowy.
- Designed a **responsive and user-friendly UI** for clear and interactive weather presentation.

Chat Application | Flutter & Firebase

- Developed a **real-time chat application** using **Flutter**, **Firebase Authentication**, and **Cloud Firestore**.
- Implemented **user registration and login** with email and password authentication, including **form validation and error handling**.
- Integrated **Cloud Firestore** with `StreamBuilder` to enable **real-time message synchronization** and time-based message ordering.
- Implemented **message sending and retrieval**, storing user information, message content, and timestamps in Firestore.
- Designed **custom chat bubbles** to visually distinguish between sent and received messages and display sender information.
- Implemented **automatic chat scrolling** using `ScrollController` and handled asynchronous operations with **loading indicators**.

Languages

- **Arabic:** Native
- **English:** Very Good
